

# RDN110L

10.5" rack drawer - 1 unit with key lock

The RDN110L is a single rackspace 10.5" rack drawer constructed of cold-rolled steel, finished in a black (RAL 9004) powder coating. The finely structured finish guarantees a high scratch resistance, while the construction offers optimal strength and stability. Due to the longer mounting slots, the rack drawer is suitable to be installed in 10.5" racks.

These rack drawers can be used for the storage of any belongings related to the rack-mounted equipment, such as cables, remote controls, instruction manuals, etc.
